SKILLS

Front-End

JavaScript ES6, HTML5, CSS3, React, TypeScript, Responsive Design, Accessibility

Frameworks & Tooling

Astro, Svelte, Node.js, GraphQL, Vite, Webpack, Git, Docker, CI/CD

AI-Assisted Development

Cursor, Claude, Copilot, AI Code Review & Iteration

Back-End & Data

Ruby, Ruby on Rails, PostgreSQL, SQL, Python, R

Visualization & Graphics

D3.js, Canvas API, Three.js, GLSL, SVG, GSAP

EDUCATION

2026 (IN PROGRESS)

Modern Journalism
NYU & Rolling Stone

2026

Digital Experiences, Marketing & Ecosystems
UNAM Faculty of Arts and Design

2025

Statistics & Probability for Data Analysis
UNAM Faculty of Sciences

2023

UX Principles
UC San Diego

2018

Full Stack Web Development
Codeup

2009 – 2011

Master Studies, Gender, Social & Policy
PRIGEPP FLACSO, Argentina

1996 – 2001

Bachelor's Degree, Law
University of Guadalajara

LANGUAGES

English (Fluent), Spanish (Native)

Monica Cholico

Front-End Software Engineer

EXPERIENCE

The New York Times

2021 – Present

Front-End Software Engineer

- Build interactive, content-driven single-page applications using JavaScript, HTML5, CSS3, Astro and Svelte for NYT's digital platforms
- Architect modular, reusable front-end components ensuring cross-browser compatibility, responsive design, and accessibility compliance
- Collaborate with designers, product managers, editorial teams, and back-end engineers in an Agile environment
- Actively use AI-assisted development tools (Cursor, Claude) for code generation, review, and iteration across personal and professional projects
- Exploring workflow automation to reduce friction in team processes, including Slack-to-Jira integration prototypes

Planeta Mujer — Interactive Platform

2025 – Present

Full-Stack Developer — planeta-mujer.org

- Designed and built a high-performance interactive platform from scratch using vanilla JS, D3.js, Canvas API, and SVG
- Engineered a Canvas rendering pipeline handling 10,000+ animated particles at 60fps with D3 force simulation for complex data transitions
- Implemented scroll-driven navigation architecture (Scrollama) with responsive layouts across desktop, tablet, and mobile
- Built end-to-end data pipelines: sourcing, cleaning, and transforming World Bank and OECD datasets into interactive visualizations
- Implemented SEO infrastructure: structured data (JSON-LD), Open Graph, sitemap, analytics

Feel Like Dancing

2014 – Present

Developer & Founder — feel-like-dancing.com

- Currently rebuilding the platform from WordPress to Astro with Svelte islands and React components for improved performance and developer experience
- Managed a high-traffic WordPress site: custom theme development, plugin configuration, SEO, and content architecture

USAA

2019 – 2021

Front-End Software Engineer

- Built and maintained front-end applications, developing a reusable JavaScript component library in a fast-paced Agile environment
- Ensured cross-browser compatibility and performance optimization across storefront web pages using HTML, CSS, and JavaScript

Brokerage Engine

2018 – 2019

Full-Stack Developer

- Built and extended features across the full stack: React and GraphQL on the front-end, Ruby on Rails on the back-end
- Worked with PostgreSQL, Docker, and Linux in a SaaS product environment

U.S. Embassy in Mexico City / Dept. of State

2003 – 2009

Fraud Investigator & Training Designer

- Developed systematic analytical processes for pattern recognition and case building across large, complex datasets
- Created training programs and documentation to standardize investigative procedures for diverse teams

KEY TECHNICAL PROJECTS

- **Slack-Jira Workflow** — Exploring automation to streamline Jira issue creation from Slack conversations (in progress)
- **Feel Like Dancing (Astro)** — Migrating WordPress site to Astro framework with Svelte/React islands and TypeScript
- **Portfolio (Three.js)** — Custom WebGL shader-driven portfolio with GLSL, Three.js, and scroll-driven transitions
- **Canvas Particle Engine** — 10,000-particle rendering system with D3 force simulation for data-driven morphing animations
